CENTERBOARD MODEL	
Draft Centerboard up	3' 0"
Draft Centerboard down	7' 0"
SHOAL DRAFT MODEL	
Draft	3' 8"

The Watkins 27 is available with a shoal draft keel or centerboard. She differs from other designs with her generous beam of 10' and moderately heavy displacement of 7,500 lbs. Emphasis is on interior room, storage areas and cockpit space. Her interior adds up to more than standard accommodations with a very roomy head compartment, pressured water, shore power and many extras, all standard equipment. She sleeps five in big berths and happily avoids the dinette arrangement, preferring the more practical table that drops from the forward bulkhead. The galley is L-shaped and to the starboard of the companionway. The Watkins 27 is at least a foot wider and 1,000 lbs. heavier than the average 27' yacht, with her rig proportionately larger than average to move her at good speed.

Photographs may illustrate optional equipment. For information and prices, contact your dealer.
