

33 CRUISE-ABILITY

**BIG
STRONG
COMFORTABLE**

If you're sailing a Watkins 33, you've "arrived," from the time you set foot on this exceptionally roomy, solid yacht. Like all Watkins yachts, she's a tried and true blue water sailor. All our yachts have navigated some of the world's most difficult waters. And the 33, like our other yachts, takes you there in comfort. Just ask our owners!

In port, the Watkins 33 "lives" and entertains like a yacht engineered for people — which she is — with 6'5" headroom that is unexpected in yachts under 40 feet.

BIG! Spacious deck space, cockpit, and belowdecks as well as the way she takes to blue water remind you every moment that you're on a big yacht. Our 33's excellent displacement/length and ballast/displacement ratio assure stiff and smooth handling.

STRONG! The 33 has our exterior through-bolted hull-to-deck joint, the strongest on the market, and a trouble-free internal keel. These features and the hand-laid one-piece hull with deck and hull liners result in a stiff, quiet yacht. All spars and rigging are the best on the market. Like the rest of the 33, they're "over-engineered."

COMFORTABLE! The Watkins 33 gives a new definition to comfort in a 33, and it's not just a matter of roomy, airy comfort in port. It's quiet solidity under way, in all conditions. The hull and deck liners make the Watkins 33 cooler on hot days, and warmer on cold days. Ventilation is superb, with ten top-of-the-line aluminum opening ports with screens and hatches.

Beautiful rugged velour fabrics, teak cabin sole, and teak trim accentuate the built-in luxury.

COMPARE the Watkins 33 with other 33's. Compare it with larger yachts. Foot for foot, dollar for dollar, and feature for feature you'll choose the bigger, stronger, more comfortable Watkins 33, for its Cruise-Ability!
